SUMMARY

Informatics Engineering graduate with professional experience as a Fullstack Developer in developing Point of Sale (POS), booking management, and large-scale web applications. Experienced in building scalable backend services, integrating third-party APIs, and developing web and mobile applications using Laravel, Go, TypeScript, React, Next.js, and Flutter. Passionate about backend engineering, mobile development, and the Internet of Things (IoT).

WORK EXPERIENCE

Fullstack Developer
PT Kisun Kreasi Digital

August 2025 — July 2026
Jakarta

- Maintained and optimized a large-scale Point of Sale (POS) system used by more than 500 merchants, processing hundreds of thousands of transactions each month while ensuring system stability and high availability.
- Integrated the WhatsApp Business Official API to automate customer messaging and notifications, improving operational efficiency and customer service.
- Integrated the Google Calendar API into the booking management system to enable automatic and accurate schedule synchronization.

Fullstack Developer
Utama Web

August 2024 — July 2025
Samarinda

- Designed and developed a Point of Sale (POS) system for centralized data management across multiple business locations.
- Improved system responsiveness by implementing real-time data synchronization using WebSocket technology.
- Developed modules for employee management, payroll, correspondence, and attendance management, improving internal administrative efficiency.
- Implemented automated financial reporting, accounting, and inventory management features.

EDUCATION & PROFESSIONAL TRAINING

STMIK Widya Cipta Dharma
Bachelor of Informatics Engineering (GPA: 3.83/4.00)

Samarinda
2021 — 2025
